**UNLOCK THE POTENTIAL OF YOUR CRYPTO WITH ASTL**

# ABSTRACT FOR ASTL PROJECT

- ASTL Token Project from the investment company Astol Advanced Limited (Hong Kong) is an infrastructure project based on partners investing in the newly created mining of various cryptocurrencies by us, working on the principles of AI management, both in terms of servicing blockchain requests and distributing computing power, and in part using only "green" energy sources for multiminig and intelligent energy management.
- The main goal of the project is to provide a simple and understandable access for each investor to receive a constant fixed income from the extraction of new types of cryptocurrencies for investors of different levels of training, from beginners to professionals.
- Each token is backed by the capitalization of the entire ASTL project and Astol Advanced Limited. Thanks to this, the token provides its holders with quick access to a stable income.

# THE CURRENT STATE OF THE CRYPTO MARKET

Despite the fact that the cryptocurrency market has already reached trillions of dollars in market capitalization – and is still growing exponentially –

we have still only scratched the surface of what cryptocurrencies are able to achieve. The majority of crypto wallet holders purchase multiple cryptocurrencies but don't actually earn anything on their holdings. Instead of maximizing the utility and earning potential of their crypto investments, they merely hold them in the accounts of centralized crypto exchanges like

Binance, Kucoin, and Coinbase, as well as in wallets like Trust, Exodus and Token Pocket.

---

**UNLOCK THE POTENTIAL OF YOUR CRYPTO WITH ASTL**

# CHALLENGES CURRENTLY FACED BY THE CRYPTO

- **Huge, Idle Crypto Funds**

Over \$1 trillion in crypto sits idle in centralized exchange accounts or wallets – with the value of these assets projected to grow more than a staggering over \$5 trillion by 2025. Yet, while investors watch the value of their portfolios increasing or decreasing every day, they fail to make their crypto work for them. Consequentially, they squander the huge opportunity of putting their highly-valuable assets to work for them.

- **Lack of Trust**

Centralized exchanges have consistently shown that they can't be trusted with the custody of their users' cryptocurrencies. As a result, staking crypto on these platforms goes hand-in-hand with the risk of their account being hacked - and the loss of their entire portfolio. As it stands, crypto exchanges get full control over their users' funds and they're left with no option other than to trust them.

---

**UNLOCK THE POTENTIAL OF YOUR CRYPTO WITH ASTL**

# CHALLENGES CURRENTLY FACED BY THE CRYPTO

- **Lack of Access**

To stake their crypto with the current generation of centralized exchanges or platforms, users have to submit to a lock-up period. This period can range from days to months, or in some cases even years. While their funds are frozen in this way, users can't take profit from market trends, invest in other emerging opportunities, or even simply liquidate their position.

- **Lack of Technical Knowledge**

Staking cryptocurrency on decentralized platforms may be smarter and more profitable in the long run, but many cryptocurrency holders lack the technical ability to do so. Consequently, many users settle for centralized staking platforms because it is an easier choice, and decentralized staking continues to struggle for popularity, inventing "cloud mining", instead of offering simple and reliable solutions.

# ASTL INVESTMENT PROJECT MISSION

- **HIGHLY PROFITABLE INVESTMENT IN MINING UNDER THE CONTROL OF ARTIFICIAL INTELLIGENCE**

The basis of the project is the creation and operation of our own data centers and master nodes with the condition of constant replenishment of the fleet of computing power devices for mining using the capabilities of Artificial Intelligence and using exclusively "Green" energy. The ASTL token is the key product of the project and the link between professional equipment and the end user. Each ASTL token implies a direct investment in a portion of the computing power of the ASTL project's device fleet. Thanks to this, the token provides its holders with stable and quick access to passive income in cryptocurrency. Thanks to smart power management and AI-driven blockchain, getting cryptocurrency from ASTL mining is 25-30% more profitable than investing in comparable projects.

---

**UNLOCK THE POTENTIAL OF YOUR CRYPTO WITH ASTL**

# **ASTL INVESTMENT PROJECT MISSION**

- **NEW TECHNOLOGIES AT THE SERVICE OF YOUR INVESTMENT**

Thanks to the planned use of the latest mining equipment, as well as "green" energy, that is, the energy of solar panels, compact windmills-electric generators, the energy of hydro and nuclear power plants, as well as the rational management of energy distribution and storage (for which the ARNO project was originally specially purchased) and consumption during mining, through the use of AI, we have achieved much greater returns from mining and practical independence from energy prices and directive state regulation of energy consumption. AI control of the computing power and algorithm of the blockchain also allows us to generate more mining profits for you than our competitors.

**UNLOCK THE POTENTIAL OF YOUR CRYPTO WITH ASTL**

# ASTL INVESTMENT PROJECT MISSION

- **THE BASIS OF WELL-BEING IS EASIER THAN EVER WITH US**

By investing in the innovative ASTL investment mining project, it has become much easier and much more comfortable to profit from your investments. We do not invite you to participate in "cloud" mining, acquiring part of the computing power or investing your funds in the purchase or rental of equipment or any part of it. We do not want you to depend on the current rate of the cryptocurrency and its volatility in the market. We offer you a stable monthly income in dollar-pegged cryptocurrency - USDT, depending only on the amount of funds you invest. At the same time, the proposed ROI, for VIP investments, can be up to 20% per annum, and the initial investment threshold is very low - only 100 US dollars or their equivalent in cryptocurrency at the current rate.

The rewards for your investments are transferred to you monthly, weekly or daily automatically, in accordance with the investment plan you have chosen and the total amount of your investments.

# WHY ASTL INVESTMENT PROJECT?

## • A SIMPLE AND RELIABLE INVESTMENT WITH HIGH INCOME

### FAST START

Now you absolutely do not need to worry about buying or renting equipment for mining, setting it up, maintaining and updating it. Accruals, in accordance with the package you purchased, begin immediately after the purchase of the ASTL token and the recalculation of your contribution to USDT.

### HIGH LIQUIDITY

Unlike mining equipment with its eternal problems, the ASTL token has high liquidity, since it is provided with a real hash rate when mining a diversified portfolio of cryptocurrencies. The ASTL token, unlike real equipment, is not subject to depreciation and obsolescence with mandatory depreciation.

### USDT REFUND

Each owner of the ASTL token package receives a fixed reward in USDT from the general pool in accordance with the amount of invested funds. You no longer need to keep worrying about the rise or fall of the cryptocurrency market - you will make a profit even during periods of general market stagnation.

### LIQUIDITY GROWTH

The ASTL project team, using the mechanism of continuously increasing mining capacities, generating the “green” energy necessary for this and diversifying cryptocurrency mining, ensures the stability of payments and the reliability of your investment portfolio, while increasing the liquidity of the project as a whole and the potential of mining working for you.

# WHY ASTL INVESTMENT PROJECT?

- The ASTL project is included in the currently created general, based on new WEB3 opportunities and AI possibilities DeFi ecosystem (EcoMind ecosystem) of the Astol Advanced Limited investment and mining foundation, acting as a “bonus” token to guarantee incoming investments and accrue passive income in cryptocurrency, while providing, in the future, after the ICO/IEO , the possibility of a full return on investment through trading on the largest crypto-platforms, both centralized like Coinbase, WhiteBIT, LBank and decentralized, like UniSwap, RobinHood and PancakeSwap.
- Astol Advanced Limited has put significant effort into the tokenomics and ASTL token model. As such, our token has been designed to reflect the success of the platform and to incentivize a healthy ecosystem, bringing together token holders and AI platform clients.

# WHY ASTL INVESTMENT PROJECT?

- **YOUR INVESTMENTS ARE STARTING TO WORK FOR YOU RIGHT NOW!**

- To accommodate a new independent own mining center with energy consumption from “green” sources, the ASTL investment project has been selected on the basis of the Kalinin NPP of the Rosatom concern. The new data-center will be created on the basis of the supporting center of data processing (data center), located in the immediate vicinity of the nuclear power plant (Tver region, 380 km from Moscow), which will allow you to have at its disposal a uninterrupted source of power supply directly from the nuclear power plants, accessible capacity for equipment placement At the level of 48 MW, high physical and information security of critical data, as well as the presence of large free capacities for further expansion of the IT infrastructure of the ASTL project.
- The rewards for your investments are transferred to you monthly, weekly or daily automatically, in accordance with the investment plan you have chosen and the total amount of your investments.

---

**UNLOCK THE POTENTIAL OF YOUR CRYPTO WITH ASTL**

# TOKENOMICS OF ASTL TOKEN

- The ASTL project token is designed to represent and guarantee direct private investment in the mining of various cryptocurrencies on various blockchains, including the mining of bitcoins (BTC and BTH) and altcoins such as Ethereum (ETH), Litecoin (LTC) and the list goes on. The ASTL token is provided with real computing power through various protocols, the main of which are the SHA256 and Erc20 or more protocols. ASTL token holders get the opportunity not to depend on the rate of the cryptocurrency mined during mining, but, using all the computing power of the Astol Advanced Limited fleet of devices and created master nodes and pools of various cryptocurrencies, receive a monthly strictly fixed remuneration in USDT (Bsc20) from the general pool.
- The ASTL token is based, in anticipation of the transition of the Ethereum network to PoS, on the ETH - ERC-20 blockchain. Link to **Etherscan Contract**. Initial issue of 50,000,000 ASTL.
